CENTRAL OF BRAZIL (State) RAILWAY

Tenders are invited for the supply of 120,000 tons of

By order of the Administration, I hereby notify that on 1st October next tenders will be received for the supply of 120,000 tons of first-class coal for the consumption of this railway the coming year.

Every proposal must be accompanied by a certificate of deposit for the sum of Rs. 500,000, to be previously effected at the Treasury of the Railway as guarantee of good faith of the tenderer, which deposit will refer to the coffers of the Railway in case of refusal to sign the contract if adjudicated.

Tenders should be presented in the office at the day and hour indicated, properly closed and written in black ink, duly stamped, dated and signed to be opened and examined in the presence of the parties interested.

The bases of the contract will be as follows:

The contractors undertake to furnish coal of first quality and in accordance with the stipulated conditions, newly extracted from Cardiff mines, or from others of equal quality, freed from dust, ash and containing not more than nine-tenths per cent. of sulphur. Its heating power must be not less than eight thousand one hundred (8,100) calories per gramme, measured by Thompson's calorimeter, all of which will be verified by analysis and experiments to be realized by the Administration of the Railway, or by anyone it may nominate for that object.

The coal that, duly analyzed and experimented on, should not satisfy the conditions of the preceding clause will be rejected and immediately replaced by the contractor with coal of proper quality. In order that the Railway shall run short of supplies in which case it will be purchased in the market, all the coal to be delivered is to be stored in the contractors' in addition to the fines they may have incurred.

The coal must be delivered in large lumps, not more than five per cent. of small coal, no cubic inches of which being admitted.

The means of ensuring the execution of this clause will be determined by the Administration; it may consider most convenient.

Should the quantity of small coal at each delivery result to be greater than that agreed on the coal will be rejected, on account of the contractor, and the quantity of pieces less than thirty cubic inches in size shall be reduced to the proportion agreed on.

The coal may be delivered as may be agreed either alongside the vessel, or alongside the pier or wharf of the station, or at the station, and in quantities corresponding to the rate of ten thousand (10,000) tons per month, not exceeding on any particular day the amount of five hundred (500) tons, and with the express stipulation in the respective certificates that discharge per working day cannot exceed two hundred and fifty tons. In the first case, transport of the lumps from the ship to the pier or quay, and thence to the waggon or deposits on shore will be made at the Railway's expense. In the second, the last only will be charged from the contractor, with provision of the means of transport to be effected by the Railway employees or by the contractors, as the Administration may determine, with previous advice of three days at least.

Prices will be considered to refer to the English ton of one thousand and fifteen kilograms for all coal delivered under reference hypothesis, exclusive of transport, and the contractor will be charged for the railway being effected by employees of the railway itself.

In case of a strike amongst the miners of the mines that supply the coal at the port of Cardiff the contractor will be obliged to continue supplying the Railway, though it may be of other origin, at the price contracted, the quality of the coal in this case to be equal to the best used on the English Railways.

All payments will be made at the Treasury of the Railway, National Money currency within the period of ten days after delivery of each cargo, and will be calculated at the rate of Exchange of the day preceding the payment, the price being stipulated in pounds sterling.

Delivery will commence in the first fortnight of the month of January 1899, and end in December of the same year.

The Administration of the railway will preserve the right to increase or decrease the quantity to be furnished monthly up to twenty per cent, with sixty days previous notice to the contractors.

The contractors in guarantee of execution of their contract will, on signature of the contract, deposit in the Treasury of the Railway the sum of forty million (40,000,000) of its equivalent in gold, to be applied to any fines in which they may incur, being, however, not to make good the sum of one million (1,000,000) of its equivalent in gold, in case of fine that it suffers a reduction in amount. This deposit may, if desired, be substituted by Government bonds duly registered. Deposits in money will carry no interest.

In case of failure on the part of the contractors to observe any of the clauses of this contract, the Administration of the Railway will be empowered to impose fines to the amount of two to twenty centes of reis (200,000 to 2,000,000) in proportion to the gravity of the offence.

The suspension of delivery for more than one month, or any attempt to supply an article of inferior quality, will be considered as a breach of the contract and forfeit by the contractor of the sum deposited, stipulated in clause X; which will then revert to the coffers of the railway.

From the acts and decisions of the Administration of the Railway the contractors will have the recourse of appeal to the Minister of Industry, Railways and Public Works only.

Office of the Secretary of the Estrada de Ferro Central do Brazil.

10th August 1898. Manoel Fernandes Figueira.

The following is a list of the vessels lost by Spain in the recent war with the United States: "Infanta Maria Teresa," 7000 tons, "Vicaya," 7000 tons, "Almirante Oquendo," 7000 tons, "Cristobal Colon," 6850 tons, "Reina Cristina," 3520 tons, "Castilla," 3760 tons, "Reina Mercedes," 3090 tons, "Don Antonio Ulloa," 1100 tons, "Don Juan de Austria," 1150 tons, "Isla de Cuba," 1015 tons, "Isla de Luzon," 1015 tons, "Jorge Juan," 985 tons, "Blanca," 560 tons, "Galicia," 541 tons, "General Lezo," 520 tons, "Marquez del Duero," 500 tons, "Fernando el Catolico," 500 tons, "Purros," 380 tons, "Pluton," 380 tons, "Pizarro," 300 tons, "Cala Española," 235 tons, "Callao," 203 tons, "Centinela," 200 tons, "Ley," 180 tons, "Alfonso XIII," 180 tons, "San Juan," 180 tons, "Delgado Parejo," 85 tons, "Guardafium," 65 tons, "Estrella," 43 tons, "Golondrina," 43 tons, "Baraca," 40 tons, "Yunior," 40 tons, "Guanitama," 40 tons, "Mayar," 35 tons, "Dependence," 35 tons; 35 vessels, 45,150 tons. This list does not include the merchant steamers armed as cruisers and transports.

WEST COAST ITEMS.

—A severe earthquake shock was experienced at Mollendo, Peru, on the 31st ult.

—A Lima telegram of the 31st ult. says that the congress of Brazil had suspended its sessions until the government guarantees order and peace.

—A report, which continues to gain in consistency, has been circulated for some days past to the effect that at the end of September the government will be in a tighter fix than ever for money, and that a further issue of fifty millions of inconvertible paper is inevitable. Perhaps the minister of finance may be able to furnish some explanation on the matter. — *Chilian Times*, Aug. 13.

RIVER PLATE ITEMS.

—A Montevideo telegram in a Buenos Aires paper makes the following statement: — "A syndicate of Argentine capitalists will shortly propose to the council of state a scheme by which it would establish in the island of San Gabriel (almost inoperative Buenos Aires) an important bathing establishment, hotel, casino, gambling-hells, etc. They ask for a concession for 10 years, after which the improvements made in the island would become the property of the state." We think we remember hearing of this scheme, or of a very similar one, some years ago, but nothing came of it then, and nothing is likely to now. The present council of state fortunately contains too many honorable men to entertain such a proposal. — *Montevideo Times*.

—Consul Ruffin, of Asuncion, on May 2, 1898, writes: "Uruguay is lighted with kerosene oil and oil imported from the United States. No electricity or gas is used other than that generated by private factories. Kerosene comes in 5-gallon tins, which form permits convenient storage in the boats plying between Asuncion and Montevideo, Uruguay. It seems to me it would be more profitable to send tank steamers, which would reduce the cost and thereby increase the sales. The tanks could immediately be sold, because of the great demand in this time, thus obviating the expense of returning them. Since the war with Spain, the price of oil has gone up nearly 50 per cent, and there is much speculation. The United States has a monopoly of oil imports, 36,618 gallons being imported in 1897, at a declared value of \$19,511 gold. The duty is 25 per cent ad valorem." — *U. S. Consul Reports*.

Not so very long ago a Gymnastic Club was founded in Montevideo and it is now said to be in good working order and to contain all the principal necessities for such an establishment. Not content with local tournaments, they have lately challenged the Club de Gynastica y Esgrima of this city to a "mortal combat" to take place at their premises in Montevideo. Amongst natives and all English residents who have visited the Club de Gynastica y Esgrima in this city it is admitted that it is most probable that another such club with such perfect fittings and such a sound foundation does not exist in South America, and it is generally met on a par with some of the best in England. Such being the case it would seem folly on the part of the newly-born club in Montevideo to challenge such strong opponents. Wisdom, however, is only obtained by experience, and, such being the case, we wish the club on their future efforts add, "a gentle let down." Among those who will represent the Buenos Aires club figure the names of Oliveri, Voiglander, Ramo, Quenda, Peyron, Christian, Cramer and others. A stronger representative team can be put together at a home tournament, but, owing to the distance which they have to travel to meet their opponents on this occasion it is found impossible for some of the best athletes among the members to take part. Prizes will be awarded for all the items on the programme, while others will be given for the best performances of independent gymnastics. — *Times*, Buenos Aires.

MANDIOCA IN PARAGUAY.

Consul Ruffin writes from Asuncion, May 2, 1898:

Mandioca is a product peculiar to tropical or semi-tropical regions. It is something like the sweet potato, except that it is not as sweet, but is more starchy. No product of the soil is more universally used in Paraguay. Every family, rich or poor, has it upon the table. It is usually cooked with meat, together with corn, sweet potatoes, and other vegetables. This constitutes the national dish. It is also used in making starch, corn starch not being known.

Mandioca is light brown in color and is 1½ to 2 feet in length, with a diameter of 1 to 1½ inches. It is planted in May, and during the winter months (June, July and August), it is in the best condition to be marketed, although it grows throughout the year.

For 5 cents good enough mandioca can be bought to furnish the substantial part of a meal for five or six persons. The Agricultural Bank, a government institution, has entire charge of the farming interests of the republic.

The crop this year is good. Modern agricultural methods and machinery have been introduced with gratifying results. United States machinery which, if its efficiency were generally known, revolutionize agriculture in Paraguay. — *U.S. Consul Reports*.

A HIGHLANDER IN WAR.

Here is a human document from the Egyptian campaign which the author of "The Red Badge of Courage" might have written. It is from the pen of a simple non-commissioned officer—Corporal Janrie, of the Seaforth Highlanders, whose name was officially included by mistake in the list of wounded. Informed of this fact, the corporal wrote to his family in the following strain: "Of course, you will have read the dispatches where I figure amongst the wounded, and pose as an interesting invalid. I was wounded, it is true, but so slightly that I thought no more of it than a football accident. But after that day I became an object of curiosity to officers and men, who unanimously dubbed me the invulnerable and appear to fancy I can undergo the fire of a whole regiment without any bad effect. As a matter of fact, I went through the battle with my clothes riddled by bullets, and, notwithstanding the official account, without a wound. When attacking the entrenchments I had to congratulate myself on my habit of venturing boots a size too big, as both my shoes were torn to pieces by bullets. Almost at the same moment a bullet smashed the wooden stock of my gun, which I threw away to grasp my sword. I then noticed that the thought of my bag had been out in two; that my water gourd, containing my tea, had been drilled; that my sleeves were in holes and I heard on my helmet something like a hubbub. Second in hand I followed my comrades, and was quickly engaged with two old ones niggers, who finished my undressing by slinging my jacket with their lances. A bullet tickled the top of my right hand enough to bruise it, and I believe it is to this wound, though I dare not swear it, that the official despatch alludes. In short, when we returned companies it was discovered that I was a minor, including shoes, helmet, and accoutrements, had received 162 wounds, each more deadly than the other. I was naked, and marching about dragging my lances with me. I looked so funny that my colonel told me to show me to the general, though rarely had I been less presentable. Sir Herbert Kitchener could hardly credit his eyes. Eighteen explosives were found at the bottom of my drawers, and I must certainly have dropped more on route. I then learnt that my sergeant had entered the scratch on my hand as my wound. However, I came well out of the affair, instead of getting a wound, I received a brand new uniform at the hands of the Chief."

RUBBER FROM CORN

Samples of the new rubber substitute made from corn have been shown on the market, say a grain trade paper. It is made from the oil derived from corn, and by vulcanizing it in commerce with an equal quantity of crude india rubber, a substitute is produced which, for certain purposes, is equal to the best gum rubber at a greatly lessened cost. The new corn rubber is claimed to possess all the essential qualities of Para rubber, including resiliency, and the discovery has been hailed with delight in the corn-growing states of the west. The manufacturers claim that the fact that corn oil does not oxidize readily makes this product of great value, since it is not affected by oxidation, so that products manufactured from it will always remain pliable and not crack as those made from other substitutes. This interesting substitute for rubber is very dark brown or black and it easily rubs off in light brown rolls. It is at present sold as low as six cents a pound. — *Merchant's Review*, July 22.

CRICKET.

Looking over some old files of the *Anglo-Brazilian Times*, which preceded the *Rio News* as the English paper in Brazil many years ago, we found the account of a cricket match which was played 26 years ago, and we now republish it as an interesting item which shows how the love of England's national game descends from father to son. Eleven at least of the players will enjoy the reproduction of their tests in the cricket field a quarter of a century ago, as Messrs. R. S. Quinle, H. Tourinho (to-day the Visconde de Tourinho), G. Pullen, G. E. Cox and P. Swatwick are alive and well in Rio, and Messrs. R. L. Price, B. J. Freeland, W. Baillie, G. Tatum, H. Cassels and J. V. Hall are alive and well in England. We have lost sight of Messrs. Mort and R. Robinson. They were splendid sprinters both in those days, and we hope they are still in the land of the living. Messrs. E. Mande, E. W. May, W. Tross, C. P. Popham, F. Penwell, C. Tross and W. Ginty have joined the majority.

The game was played on the ground which is now swallowed up by the Rua General Polidoro in Botafogo, but was then known as the Rua Berço. We think it a pity to lose a scrap of such an antique gem, so we reproduce the description and score as it originally appeared. Here it is:

The Rio Cricket Club Ground was opened on Thursday 15th instant with a game played between two sides selected by Messrs. R. L. Price and G. E. Cox.

It was very well contested, and finally resulted in favor of Mr. G. E. Cox's side by 38 runs, as the score attached will show.

On the 7th proximo a match will be played, and we hope that, notwithstanding the counter-attractions on a holiday it will receive a fair amount of patronage.

S. PAULO RAILWAY v. SANTOS A. C.

This return match between the above clubs was played on the ground of the S. P. A. C. on Sunday August 28th. The Railway winning the toss, put Santos in to bat, but with the exception of some hard hitting by Barber and later on a good innings by Lewis, the score would have been very small. As it was their innings closed for 75 Runs taking 4 wickets for 8 runs. After a short interval, the Railway opened their innings. Two wickets fell for 5 runs, but on Wyatt being joined by Webster things improved a little, but the bowling was too good and Webster's wicket soon fell for a pretty and useful 11. Knight lived matters by hitting his first ball off Stock to the boundary for 4 and again in the next over treating him the same way, but Stock was too old a hand to mind this and sending down a short pitched ball clean bowled him. After this Stock soon finished off the innings taking 6 wickets for 12, the innings only reaching 46. After the usual interval Santos commenced their 2nd attempt, and some hard hitting by Burgos and Stock enabled them to declare at 99 for 3 wickets and sent the Railway in to get

123 to win in a little over an hour left to play—an impossible task. Stewart and Florde, who seemed last to have broken the run of ill luck that has followed him, placed a very good innings 23 not out and the match terminated with the Railway 56 behind and 7 wickets in hand. Santos won on the first innings by 23 runs—a well deserved victory. Their fielding was remarkably clear and round. Tomlinson at point being very smart.

The hon. secretary asks us to extend a hearty invitation to the members of the Rio clubs to contest the events. The entrance fee for non-members of the S. Paulo Athletic Club is \$5.00 each event, and entries for the sports will be received by Messrs. Florde, Miller and Lamont who will be in Rio this week playing against a picked local team.

QUARANTINE AND CURA.

One of the greatest bars to commerce and civilization is the epidemic disease. The Black Death, which is the bubonic plague of India at the present time, came near throwing Europe back into savagery. The artificial trade restrictions of an age when commercial means were of the crudest character were nothing compared with the medieval styles of quarantine as obstacles to commerce. Sanitary science, distinct in cleanliness, drainage, the safe and thorough removal of waste, have done as much as education has to make trade between countries possible. For twenty years the yellow fever has had no such terrors for this country as it had formerly, and the yellow fever is an importation, almost entirely from

Cuban ports. Whatever political and industrial changes this war shall make in Cuba no change will be greater than the sanitary change which will result from the occupation of the United States, even though occupation be but temporary. It is evident that Santiago is getting such a clearing as it never had before, and after we have acquired possession of Havana we shall give that city a clearing that will break the back of the yellow fever. As Havana harbor has no tidal wash it will probably be necessary to change the course of the main sewers before yellow fever is exterminated there; but within a few years after the removal of the Spanish flag Havana will cease to manufacture yellow fever for export to the United States. It is a great triumph of our medical men that more of our soldiers in Santiago are not down with yellow fever, and that thus far no yellow fever has got into the United States.—*N. Y. Journal of Commerce*, July 27.

When our seas smoke from the chimneys of a winter, with tendency to sink to the ground, it indicates that the atmosphere is light—in fact, too light to hold the smoke. When the smoke rises from the chimney, it indicates a heavy atmosphere. A column of smoke is not a bad barometer, for a barometer simply records the pressure of the atmosphere. When the atmosphere is light and the smoke settles, the pressure on the mercury is light and the column falls, indicating a storm. When the atmosphere is heavy and the smoke rises, the pressure is greater and the column rises, indicating fair weather.

SEA SICKNESS

ADMIRABLE RESULTS.

We are constantly receiving communications from seafaring men in Brazil and elsewhere, which fully attest the extraordinary efficacy of the Panfla remedy. Nausea and vomiting, the distressing sea-sickness, the most common ailment of sailors, of the stomach and intestines so frequent during voyages at sea or on land. As well known are the results given by this remedy in this case, that no traveler aware of its properties, should start on a voyage without providing himself with it as a preventive measure against himself with it as a preventive measure against himself.

On the 14th May last, the distinguished physician, Dr. Manoel Paulo wrote us as follows: "I have used the Panfla remedy on board the ship *Albino*, a steamer of sea service, treated with the Panfla remedy. As a result of sea-sickness, the Panfla remedy was a decided relief. Cases of sea-sickness that have been mentioned in the case of the Panfla remedy. A. A. attacked with a very violent sea-sickness; the case of S. L. C. just this steamer from whom the Panfla remedy was obtained, and in the case of S. L. C. the Panfla remedy was a decided relief. In view of these results we have still another proof of the fact that for sea-sickness and gastric troubles the Panfla remedy is the best and most effective remedy. Capital Federal, 10th July 1898.—Dr. Henrique Muniz."

On the 17th October, 1898, Dr. Paulo wrote us as follows: "I certify that when on board ships of war, I have had occasion to use the Panfla remedy. Nausea and vomiting, the distressing sea-sickness, the most common ailment of sailors, of the stomach and intestines so frequent during voyages at sea or on land. As well known are the results given by this remedy in this case, that no traveler aware of its properties, should start on a voyage without providing himself with it as a preventive measure against himself with it as a preventive measure against himself."

Hotel dos Estrangeiros

PRAÇA FERREIRA VIANNA

(Cafetaria)

Telephone No. 5,008

This hotel, which has been completely restored, is situated in the best part of the city, overlooking the bay, and is close to the most frequented beach of the city, surrounded by a large garden; has large, comfortable rooms, new and well furnished, good shower and warm baths, refrigerators in the water-closets, drinking water filtered by the latest system, good table service, and is, therefore, to be considered the first hotel of this capital.

Patrons, also a sumptuous saloon and splendid hall service for banquets.

Its restaurant and service cannot be excelled.

Grande Hotel Metropole

151, RUA DAS LARANJEIRAS, 151

This popular Hotel has been completely and thoroughly restored and has been provided with sanitary improvements of every description, including a hygienic system of sewerage, flushing tanks, and ventilating apparatus.

The apartments have been completely renovated throughout and are luxuriously furnished. The dining room has also been renovated, and no expense has been spared to make this:

The most comfortable Hotel

in the city. The baths have likewise been improved.

As before, particular pains will be taken to provide the guests of this Hotel with a first class table, and with the best service money can procure. The electric fan passes the hour every few minutes, making it the most convenient as well as the pleasantest Hotel in Rio de Janeiro.

FREITAS HOTEL

120, Rua do Riachuelo

Mr. J. F. FREITAS, proprietor of the old and well known Freitas Hotel, desires to advise his friends and former customers that he has reopened his hotel at No. 120, Rua do Riachuelo, in a large and most attractive edifice acquired for this special purpose.

The new establishment is situated in one of the most attractive and healthy localities in the city, on a broad and quiet street, with tram cars at all points of the city passing the door. It has a large and beautiful garden, with pleasure garden, particularly suitable for ladies and children, and well-appointed bath rooms provided with hot and cold water.

The Hotel is specially adapted for families, for whose comfort and convenience nothing will be found lacking. It contains a large dining room, and its dining room opens on a veranda overlooking the garden.

Special attention will be given to orders by mail and telegraph.

Grande Hotel Internacional

SITUATED ON THE PAVILION

SANTA THERESA HILL,

Rua do Aqueducto No. 108.

Telephone 508

Is served every 15 minutes by the electric tram-cars line from the town (leaving the Largo de Carioca) close to the doors of this hotel, and Silveira.

This establishment, the first in Brazil for its elegance, comfort and situation amidst forests and enjoying the most magnificent scenery, views of the mountains, town, the harbor and high seas, is most suitable for families and gentlemen of distinction.

Excellent restaurant, always ready.

Fined wines and liquors. Numerous shower and warm baths. Purest air, temperature bracing and invigorating. No health resort in the world is better. For further information apply to:

FERNANDO MENTGES,

ASSEMBLEIA 82, Telephone 266.

VILLA HUMAYTA.

(FORMERLY ALLEN'S HOTEL.)

No. 8, RUA HUMAYTA

This first-class establishment, situated in the pleasant and healthy suburbs of Catete, was reopened Sept. 1st, under the best management of hygiene, cleanliness, management and good order. Through its unsurpassed position in a large chalet, for its abundance of water and air, its beautiful scenery, its magnificent rooms all perfectly ventilated, and for the special service adapted, it is recommended in all persons good taste, both families and bachelor, who desire a pleasant and healthy residence of easy access. Information may be obtained of the proprietors at the establishment itself.

Hotels.

ALPINE HOUSE HOTEL

RUA DO AQUEDUCTO, 65

On the line of Silveira tramway, Santa Theresa, to be reached in 30 minutes from town.

This house is highly recommended for its excellent position and most beautiful view of the far ocean, city and islands, being situated on the very summit of Santa Theresa hill, and entirely out of reach of fever and malaria. It is a pleasure to see a place for foreigners, tourists and new arrivals.

The hotel is surrounded by beautiful parks, walks, and a large garden.

The restaurant and kitchen are first class.

THE PROPRIETOR,

VIUVA SUZANA MENTGES.

Read the following unsolicited testimony of

TROPICAL
DUNLOP TYRES

Mr. C. C. Gnapp (formerly of Bedford, and now in charge of Messrs. Walker's Cycle Works Department, Ceylon) writing to "Wheeling" says:

"The Dunlop tyre was predominant until 1895, but since the virtues of the Dunlop Tropical Tyres were proven it is quite something out of the ordinary to see a machine fitted with any other tyre. I must say that Dunlops seem to have gone to a very great deal of trouble to produce a tyre that will so satisfactorily withstand the effects of the damp and heat in the tropics, and the public here appreciate them by seeing that they get them."

PRONOUNCED A BOON AND A BLESSING TO CYCLISTS IN HOT COUNTRIES.

TELEGRAMS OF THE WEEK

United States.

Aug. 29.—The secretary for war has ordered General Miles to send back all the American soldiers in Puerto Rico and Cuba that he can dispense with. The report of Congressman Wadsworth was to the effect that to percent of the Americans were suffering from typhoid and malarial fevers.

General Miles has telegraphed from Ponce to the Spanish governor Machos commanding him not to enforce the sentence of death passed on the chief magistrate of Aguila for having declared in favor of the Americans.

Telegrams from San Juan de Puerto Rico give great importance to the intimacy existing between the Spanish officers there and the officers of the German cruiser "Goeben," the latter having been allowed to visit the fortresses.

The father of George Meek, gunner of the destroyer "Winslow," the first American killed in the Cuban campaign, has been presented with \$500 subscribed by Cuban workmen.

General Lawton telegraphed to the government saying that the state of famine in Guanantamo is terrible, and asked for 200,000 rations to be sent at once for the starving people. The mortality is great and 1,662 sick are in the hospitals.

Aug. 30.—General Miles is said to have made grave accusations against the military administration of the United States, and if the accusations are found to be authentic, it is said he will be called upon to prove them before a council of war.

The cruiser "New Orleans" entered the harbor of San Juan de Puerto Rico and fired the customary salutes to which the shore batteries replied.

General Toral is still in Santiago, his departure being delayed by courtesy visits to and from American citizens.

The democratic party have resolved to put Admiral Dewey forward as their candidate in the next presidential election.

President McKinley, accompanied by his secretaries, intends to visit the camp at Montauk.

The American minister in Peking is said to have received instructions to inform the Chinese government that the United States will view with great disfavor any concessions whatsoever which China makes to other powers.

Spain.

Aug. 29.—Telegrams from Madrid say that the reports of Admiral Cervera on the destruction of his fleet are being severely criticized. As a result of the court-martial that will be held, it is said that if not absolved, those responsible will be shot.

All the Madrid papers express horror at finding how severely the Spanish forces have suffered. The Almontara battalion that on leaving Spain was 1,800 strong, returned with a muster roll of 300 men.

Aug. 30.—The members of the Spanish commission of peace have been definitely appointed and are: Sr. Leon y Castillo, Alcala, Zamora, Stages, Villanueva and General Zavalla. The secretaries are Sr. Dubose and Sanchez. (Sr. Dubose was the ex-secretary of the Spanish legation in Washington, and his appointment has been highly received in the United States, but no official protest will be made against it.)

Three cabinet ministers have been selected to draft the message to the Cortes asking authorization for the ratification of the treaty of peace.

Aug. 31.—General Weyler has declared that from his seat in the senate he will fix the whole of the responsibility for the war on the ministry, and will advocate a military dictatorship as the only means to regenerate the country and reestablish its lowered dignity. He expressed his readiness to accept power if offered him, but should his efforts not be successful, he would definitely abandon politics. (The man whose loyalty in Cuba, and proved complicity in the cowardly destruction of the "Maine," caused American indignation and lost Cuba, Puerto Rico the Philippines and naval and military prestige to Spain, should certainly be the last man to be again entrusted with authority.)

Sr. Sagasta before finally nominating his commissioners to treat for peace in Paris, offered to put some conservative members on the commission, but Sr. Silveira declined.

Orders have been sent to Admiral Cervera and his officers to hold themselves in readiness for prompt return to Spain.

Generals Pando, Sucedo and Bruno left Cuba to-day for Spain.

Great Britain.

Aug. 29.—All the English papers discuss the proposal of the Czar of Russia to have an international peace congress in which to discuss the practicability of ensuring future peace by a general disarmament. They all applaud the idea, but sensibly enumerate the insuperable difficulties in the way of its realization. (Until the crack of doom there will be wars and rumors of wars. The continent of Europe is strewn with gunpowder at the present moment and only needs the slightest spark to produce a general conflagration. Earth-hunger, the desire for territorial aggrandizement, is the dominant passion with all the powers at the present time. The scramble for Africa, is followed by the scramble for China, and the general desire for the Philippines. Every nation is willing to wound its neighbor but each is afraid to strike—because of the great armaments. Surely never was a moment

less happily chosen for the conversion of Czar Nicholas II to the utopian ideas of Tolstoi.)

Aug. 30.—The Anglo-Egyptian forces are now encamped at Tiaf, 28 miles from Omdurman. The reconnoissances in force made by cavalry and mounted infantry tend to show that the dervishes are concentrated in Omdurman itself. A heavy storm impeded the march of the troops.

The *Times* says that the principal merchants in Manila have addressed a petition to Lord Salisbury asking his aid in preventing the Philippines from again falling under the power of Spain.

Aug. 31.—The *Daily Mail* publishes a telegram from St. Petersburg, saying that M. Witte, the minister of finance, has persuaded the Czar that his proposal for an international peace congress made on the advice of Count Mouraviev, the minister of foreign affairs, would end in isolating Russia, exhaust the necessary reserve for the maintenance of the gold standard, produce national bankruptcy in two years, and render the completion of the Trans-Siberian railway impossible. (The minister of finance has little White's about him certainly. By this time the Czar must have seen that his proposal was an impossible one. The Pope jumped at the idea which was to his taste *ex-officio*. Italy supported the proposal because she was beaten in Abyssinia and her financial condition so seriously crippled by her present military and naval system that Italians find Italy a good country to live out of, to escape over taxation. Spain would welcome the idea for obvious reasons. The United States have proved their strength and prowess and would now have no objection to join. But France, Germany, Great Britain and Japan would never consent, especially while the Alsace-Lorraine and the Egyptian questions are undecided, and Russia is defeating other powers in China, by superior diplomacy it would, however, be better for France to back up her natural ally, as the military element usually dominates her policy and is surely and inevitably leading her to another and more crushing Sedan. That the branch on which she leans is a rotten one is being proved in the Dreyfus affair.)

The *Times* says that General Merritt has left Manila for Paris, and Generals Halsey and Greene for Washington, the command devolving on General Child. It adds that General Merritt has allowed the Tagalos to send a delegate to Paris to sustain their pretensions.

Telegrams from Capetown say that a German diplomat is influencing the Cape elections in favor of the Afrikaander-Bund.

The British cruiser *Cleopatra* ran into the Norwegian bark *Norvegia* in the North Sea. The ship was violent and the bark immediately commenced to take in water. The *Cleopatra* at once lowered away boats with 18 men to work the pumps on board the bark, but all efforts were useless. The bark sank suddenly. All the crew of the bark were saved, but five British seamen were drowned.

Sept. 3.—There is now no doubt that a treaty offensive and defensive with certain limitations has been concluded between Great Britain and Germany. Germany is willing to support Great Britain in Egypt and South Africa, while Great Britain will not interfere with German policy in Asia Minor.

Sept. 4.—Telegrams from Cairo announce a brilliant British victory against the dervishes. Skirmishes lasted through two days and then the assault of Omdurman took place. The Khalifa and his men fought well outside the walls, but their greatest efforts were of no avail against the disciplined troops opposed to them. 200 dervishes were left dead on the field, and the Anglo-Egyptian army lost 200—the usual proportion in the Sudan. Omdurman and Khartoum are in the possession of Sir Herbert Kitchener, and Gordon's death has been avenged.

France.

Aug. 29.—The French newspapers applaud the proposal of the Czar to arrange the bases of a treaty of universal peace, but doubt its realization, characterizing it as "a generous chimera." There is a unanimity of feeling that before France could take any serious part in such a treaty the question of Alsace and Lorraine must be definitely settled. (The views of the other European people, as voiced by the press in the various capitals, are of equal tenor. The *Tribune* in Rome vividly says that only after a great struggle in which all the great powers were engaged could the idea of a general disarmament be practically proposed.)

The terrible Dreyfus case is expected to assume a new phase within the next few days, when sensational disclosures are expected to be made favorable to the unfortunate ex-captain who is being so fearfully punished in the Devil's island.

Aug. 31.—Mr. Cavignac, the minister of war, having his suspicions aroused as to the validity of the documents on which Capt. Dreyfus was condemned, through the cleverness of an official who compared the paper with the incriminating document was written with the paper used at the time in the German embassy, and found the ruling different from that then used, ordered the arrest of Col. Henry, who confessed that he was the author of the forgery. The motives which impelled him to commit the fraud are not yet known, but Kitchener has been struck for the resignations of Generals Boisserie and Gonse, who so theatrically moved public opinion throughout the Zola trials.

SEPT. 1.—Colonel Henry committed suicide to-day by cutting his throat with a razor. Before doing so, he declared that the discovery of his forgery would put an end to the Dreyfus question.

Holland.

Aug. 30.—The coronation of Queen Wilhelmina took place to-day at La Haye amidst great rejoicing. In the manifesto which Queen Wilhelmina addressed to the country on resigning her regency, she congratulated the people on the enthusiasm with which they supported their young sovereign, and thanked them for the manner in which she herself had been supported. She finished by saying that she had every confidence that Holland would always remain as great as a small nation could desire to be. The council of governors has also been dissolved, and the young queen assumes full monarchical powers.

Aug. 31.—The coronation festivities were continued to-day at La Haye. In her proclamation to her people, the young queen declared that she would govern with justice and the help of God. The Queen and her mother assisted at the services in the cathedral at which all the ministers and the diplomatic corps were present. Thanksgiving services were held in all the churches of the country, and the greatest enthusiasm and loyalty was everywhere shown.

CRIMINAL STATISTICS.

In his speech in the chamber of deputies on the 23rd ult., condemning the detective or secret police force of this capital, Deputy Pinto da Rocha gave the following interesting data regarding the cost of that force, together with the comparative criminal returns for the same period. That a *garantista* should condemn the employment of a secret police is worthy of note, but few perhaps will accept his conclusions that crime has increased because of the existence of such a force. There are a score of causes for such an increase in crime. The secret police apparently does but little to check it.

In discussing this subject, Deputy Pinto da Rocha said that in 1892, there was no separate appropriation for this police, whose cost in the following years was as follows:

1893.....	\$300,000
1894.....	220,000
1895.....	110,000
1896.....	150,000
1897.....	244,000

This increase in the cost of the detective police has not, he asserted, diminished crime, which has constantly increased, as is shown by the following figures:

1892	
Homicides.....	14
Attempts to kill.....	17
Arrests.....	2,515
1893	
Homicides.....	23
Attempts to kill.....	36
Arrests.....	5,283
Criminal trials.....	1,575

1894	
Homicides.....	28
Attempts to kill.....	23
Robberies.....	41
Arrests.....	5,550
Criminal trials.....	1,719

1895	
Homicides.....	61
Attempts to kill.....	33
Robberies.....	370
Arrests.....	5,685

1896	
Homicides.....	75
Attempts to kill.....	43
Arrests.....	6,917

1897	
Homicides.....	83
Attempts to kill.....	70
Robberies.....	448
Arrests.....	11,517

CRICKET ITEMS

A match between the British-Bank and the London & River Plate Bank teams was played at Netherbury on Sunday last. The result was an easy victory for the British-Bank men, who scored 124 to 70 in the first and only innings. The score had not come to hand up to the time of going to press.

On Sunday next a good match is coming off at Netherbury, married & single. We have only been able to obtain the names of the married team, which are: Geo. E. Cox, A. Hime, E. A. Benn, P. C. Morrissey, R. Morrissey, W. Morrissey, H. W. Storey, W. Nibbs, Antonio L. Santos, T. Gilford, E. Roberts and O. Rolls. Mr. T. C. Jackson is to be the scorer, and Messrs. C. E. Taylor and W. Mande will act as umpires.

Some of the heartiest applause at Lord's last week was caused by a lady, who neatly fielded and threw in one of Mr. MacLaren's drives to the boundary. Such an event is believed to be without a precedent, and the professional who stood waiting for the ball looked almost paralysed with astonishment. It must indeed have required no small nerve to perform such a feat before so huge an audience. —*Weekly Telegraph*, Aug. 13.

Some changes have taken place in the Rio team that is to play against the S. Paulo men to-morrow, and we are informed that the Rio representatives will now be formed

as follows: Messrs. Jackson, Conolly, C. Mawson, C. Robinson, R. and W. Morrissey, Francis, Roberts, G. H. Unwin, J. Mawson and H. L. Whendley, with R. H. Brookings as first reserve. For our part, we should have liked to see such a first-class cricketer as Mr. Brookings in Rio picked high up in the team.

SHIPPING NOTES

—The British gunboat *Beagle* returned to this port for mails on the 30th ult.

—The Hamburg Smlamerkaufsch packet *Citra* brought the following passengers to Rio on the 3rd inst. —From Hamburg: Dr. M. Nogueira. From Bahia: Mme. Miller and Maudslori J. Moura.

—A Para telegram of the 2nd ult. announces the wreck of the steamer *Bajard*, belonging to Srs. Afonso & Co. and commanded by Lieut. Pauli Barros. The loss was total, which is estimated at \$70,000. One man, the cook, lost his life.

—The following were the passengers who landed in Rio from the P. S. N. Co's steamer *Orellana*: —From Liverpool: Mr. and Mrs. H. Gifford and child, Mrs. and the Misses Casey (2), Mr. J. H. Lyon, Mr. R. Norton, Mr. T. Mirk, and Mr. Hippolyto Viscunelli. Mr. Oscar de Leers came from La Pallice, and Mr. José N. Correa from Lisbon. The *Orellana* had to anchor 36 hours off La Pallice, owing to a thick fog, which caused her to be two days late in Rio.

—The passengers who left Rio for Buenos Aires on the 2nd inst. by the P. S. N. Co's liner *Orellana* were Messrs. H. J. Reeves and H. Frege.

—The following passengers landed at Rio on the 29th Aug. from the P. S. N. Co's liner *Orellana*: Messrs. V. Bimeli, H. Heymann, G. Lombard, C. Defonso, C. Cervello, F. Gamba and C. Dassi.

—The passengers leaving Rio on the 30th ult. by the R. M. S. *Oriente* were: —For Liverpool: Mr. F. Simon, Mr. and Mrs. R. Morrison, Mrs. Basil Bayle, Mr. J. W. Fell, Mr. J. V. Wilbur and M. A. Blaker. For La Pallice: Mrs. E. Gumbel, M. S. Pinho and child, Miss Hiding Glogel, Mr. W. Pinho, Mr. C. Gumbel. For Vigo: Mr. Manoel P. Pires. For Lisbon: Mr. J. S. de Magalhães and family and Mr. D. de Oliveira Gomes.

—The Brazilian trade has become more active and a brisk enquiry for tonnage to Rio has sprung up. The rate from up-river ports has advanced from 105 to 125, that from below-har having increased to 115, from 95 quoted in our previous issue. All the boats now berthed are fully engaged and there are enough men and live cargoes available to fill up two more boats. In view of the condition of the freight market to Europe, an intermediate voyage to Rio would now appear to be a wise measure. —*Times*, Buenos Aires.

A better demand in the cattle trade has sprung up from Brazil, where they are not over particular as to condition of animals. The rate in Rio is firm at 3/8 but there are no seamen off-river, hence the limited business done during the week. It is very probable that 3/8 could be secured by a suitable bait. The syndicate running the most trade at Rio has engaged a Brazilian steamer to come down from the Brazilian coast to load cattle here, owing to the scarcity of spot steamers. Their boat, lately acquired in England, specially fitted for the cattle trade, will be here shortly to inaugurate their regular trade to Rio. Sailing vessels continue to be in great demand for every destination. The enquiry for sailers to land in Santos or Rio is very active, but there are none available for that business. Eight vessels were fixed during the week and as many more could have been placed had they been available. They have secured rates which are denied to steamers, and, provided that no Italian vessels appear on the scene to spoil rates, there is every chance of rates by sailers being kept very firm. —*Times*, Buenos Aires.

—The passengers who landed at Rio from the Royal Mail steamer *Dunbar* on the 5th inst. were: —From Southampton: Mr. and Mrs. Fitz-Gerald, Mr. R. M. Jackson, Mr. S. Massey, Mrs. Simpkins, 2 children and Nurse, Mr. Gabriel Motta, Mrs. A. B. Oliveira and Mr. C. Sergei. From Cherbourg: Col. C. Bento Ricardo and wife, Mr. Lavy Ricardo and wife, Mr. L. Ricardo, Miss Fanny White, Mrs. C. P. Lima, Mr. E. Meyer, Mr. W. Meyer, Mrs. Meyer, and Miss Meyer. From Leixões: Mr. I. Pinto da Silva, Mr. F. E. Costa Ribeiro, wife, sister and niece, Mr. G. A. Ribeiro, wife, child and Nurse, Mr. A. L. Parada, Mr. J. A. Gonçalves, wife and son, Mr. João de Souza, and Mr. D. Souza Carli. From Lisbon: Mr. F. F. Mesquita, Mr. and Mrs. D. R. Ferreira, and 3 children. From Pernambuco: Dr. Carvalho de Mendonça. From Bahia: Col. Manoel R. Valença, Mr. O. Magalhães and daughter, Mr. P. Pedreira Ferraz and family, Mrs. L. Gonçalves, Mr. J. M. M. Hayes, Mr. J. M. de Andrade, Mr. A. Verges, Mrs. Maria de Jesus, Mr. J. Bruno Nunes and family, Col. A. Pinho, Mr. A. M. Oliveira, Mr. Francisco Cuneo, Mr. M. G. Maia, Dr. Sta. Anna and wife, Mr. C. S. Pedreira, Mr. P. Bittencourt, Mr. A. Brousset, Miss A. C. Sar, Mrs. M. Jacome, the Right Rev. W. H. Stirling, Lord Bishop of the Falkland Islands, Mr. I. M. Ivan and family, I. Chino, I. Conceição and J. Conceição.

THE RIO NEWS

PUBLISHED WEEKLY.

A. J. LAMOREUX, Editor and Proprietor.

Contains a summary of news and a review of Brazilian affairs, a list of the arrivals and departures of foreign vessels, the commercial report and price current of the market, table of stock quotations and sales, a summary of the daily coffee reports and all other information necessary to a correct judgment on Brazilian Trade.

RIO DE JANEIRO, SEPTEMBER 6th, 1898.

THE two events of the past week which have claimed most attention throughout the world, have been the universal disarmament proposal of Czar Nicolas, and the sensational disclosures in the Dreyfus case. As to the first, it has been received with mingled feelings of approbation and doubt. No one would think of condoning the principle of general disarmament; and universal peace, but as we have not yet reached the millennium there are but few who believe that such a principle can be practically established and maintained at the present time. And for our part, we very much doubt the sincerity of the proposal. It will be found, when we know more of the matter, that Russia is seeking time, and that this unexpected proposal is but a cloak to cover a new and more ambitious move in her career of expansion. Academic proposals and discussions of universal peace may bring pleasing diversions to the tax-ridden nations of the world, and may be hailed with joy by those which have reached the end of their resources, and by those whose weakness shuts them out of all hope of conquest and aggrandizement, but behind it there stand the restless, masterful, covetous and aggressive spirits of mankind who will never be restrained by such a convention. The Russian still dreams of Constantinople, and having planted his foot in China he dreams of absorbing the greater part of that ancient empire. The Czar may talk of peace and disarmament, but the wild Cossack will be ready to advance on Peking, or Constantinople whenever the Russian wills it. We should like to see something done to reduce the military expenses of the world, but we have little faith that it will be done just yet. There are too many rivalries and animosities among the great nations themselves to permit it. Still, something practical might be done on a small scale and at once, which would confer incalculable benefit on many of the smaller nations, and enable them to dispense with their ambitious military organizations. For instance, why should Belgium, Holland, Denmark, Sweden and Norway, Switzerland, Spain, Portugal, and the Balkan states be burdened with armies and navies. Let the great nations guarantee their territorial integrity and independence, and let them abolish their military expenses. So, too, with the states of South America—they can be secured against foreign aggression, and their own petty quarrels could be settled by a permanent international court of arbitration. They will quarrel, of course, and may sometimes fight, but if they can be induced to do away with their armies and navies, but little harm can result. Enough is spent on military preparations every year to relieve much of the suffering which these nations experience from famine and pestilence, and it would be a great gain to the world if the evil could be even partially overcome. This, however, may not meet the all-embracing good-will of the Czar, and may therefore be as utopian as the larger scheme.

REFERENCE having been made to the infliction of a fine of \$1,000 on Editor Denstone of the *Montevideo Times* in the *Brazilian Review*, with the apparent object of showing that we here are not as other men are, it may be said that the sentence inflicted on Mr. Denstone is condemned by the native press of Montevideo, and that it is shown to be clearly illegal. Mr. Denstone has not only appealed, but his appeal supported by many of the leading journalists of that city. Something over a year ago a well-known Englishman, connected with one of the Uruguayan railways, was murdered by a native. The trial resulted in the assassin's acquittal. Mr. Denstone very properly denounced the acquittal, and published the proofs of the assassin's guilt. This led to his prosecution for libel which has resulted in the outrageous sentence above mentioned. It would appear that in Montevideo a man may commit murder without fear of punishment, but it is a very serious matter to call him a murderer. It may be added that several persons, when the sentence was made public, went to Mr. Denstone and offered him the amount of the fine, while hundreds of others were prompt in expressing their sympathy. An injustice of that description is often blessing in disguise, for it lets a man know who his real friends are.

BUT there is a question involved in this outrageous sentence, which has a broader application than the penalty inflicted on Editor Denstone. We are not aware of the motive which actuated the reference to it here in Rio de Janeiro, nor are we ignorant of the influence which a "precedent" may exercise over some officials. But the question is still broader than this, and it is worth the consideration of every editor who values the power and influence of the press. If a newspaper may not freely exercise the right of criticism and comment, then what is to be its work in the future? Under a despotism, no one may enquire in any act of authority without incurring risk of punishment, but under every form of free government, the right to challenge an arbitrary exercise of power is a fundamental principle. In the days of the Roman republic, the representative of the people could challenge the authority of the highest, and that in a state where respect for authority and privilege was firmly rooted in the national character. In these later days, the press has become the tribune of the people, and its right to challenge acts of government, to criticize laws and officials, or to comment on current events, ought to be as carefully protected as were the privileges of the Roman tribunes. If a newspaper may not condemn an arbitrary executive act, or an unjust judicial decision, then its chief value in any country is destroyed. We do not defend those newspapers which abuse their privileges by slandering, and fomenting disorder, but the right of serious discussion ought never to be abridged. And when a government forbids the right of free discussion in the press, it may be assumed that the liberties of the people themselves are in serious danger.

QUEEN WILHELMINA of Holland attained her 18th birthday on the 31st ult., and assumed the reins of power into her own hands. Since the death of her father, William III of Nassau, in 1890, the government of the country has been carried on by her mother, the Queen-regent, who is sister to the Duchess of Albany. The young Queen has not only to thank her mother for the easy task of taking possession of her throne amidst the acclamations of an adoring people, but also for the thoroughly Dutch education which has made her the idol of an intensely patriotic race. There is a pretty story of her wilfulness and patriotism as a child. She had been naughty, and her English governess as a punishment gave her the map of Europe to draw. She rebelled but Queen Emma insisted. The map was drawn, but Holland was swathed out of all proportion and the British Isles were comically dwarfed. A pretty series of photographs of the young Queen from early infancy to the present day appears in the last number of the *Sinbad Magazine*. We cordially hope the youngest queen in Europe will live to be the oldest and see her country flourish as she would wish it to flourish.

NORTHSEA was lacking, in our opinion, to demonstrate the intrigue and corruption which prevail in the higher military circles in France, but if anyone still hesitated to think the worst of the men who secured the punishment of Captain Dreyfus and then resorted to threats and intrigue to prevent a reconsideration of the fair which condemned that officer, that hesitation must have been dissipated by the Paris telegram of the 30th ult. regarding Lt. Col. Henry's confession. According to the telegram the officer named has confessed to Minister Carnegie that the famous letter attributed to a foreign military attaché, in which occurred the words *je suis canaille*—*I am a scoundrel*, was written by himself, and that it was not communicated either to Dreyfus or to his advice. A military tribunal that could employ forged documents and an irregular trial to secure the punishment of an innocent man, evidently to divert attention from the doings of a clique of dissolute and traitorous officers, can not be condemned too severely. It is probably too late to save Dreyfus from the crushing effects of the infamous imprisonment to which he has been subjected, but it is not too late to do justice to his name, nor to punish the men who took part in this abominable intrigue. Unless this is done, the French army and French justice will stand condemned before the world for an act of wanton and shameful injustice.

WE hardly know which is the stronger—our pity for the ignorant assumptions of *The Brazilian Review*, or our contempt for its mendacity. Nothing but ignorance can excuse the dreary twaddle to which we are treated number after number about the hostility of various persons and journals to the true interests of Brazil—as understood and interpreted, of course, by the editors of *The Review*, if their readers do not come to the fixed conclusion that he is the only true and steadfast friend the country has, or ever has had, it will not be through any failure on his part in telling them so. And as for the present administration, who but the editor of this sycophantic sheet is the *dux Achæis* on whom it may rely for counsel and comfort? And yet, but little over a year ago the *Review* was more other than the editor of this same periodical, wrote a long letter to that paper on the political situation here, in which he remained President Prudente de Moraes for being hostile to the army, for being "unable to let well alone," for "stirring up unnecessary ill-feeling amongst the military," and for going "out of his way to destroy the only alternative factor on which he could count for support." Unhappily the President did not then have the editor of *The Brazilian Review* to lean on, and of course he could not help going wrong. The new party just then organized he described as "a fortuitous agglomeration of heterogeneous elements, conflicting ambitions, and aspirations unlikely to stand the test of time or of the struggle for the presidency." But they did stand it, however, so he hastens to his happy rest at their feet and to swear by its name and forever to the agglomeration of heterogeneous elements "of which he once held support an opinion. A rare friend this, and a counsellor whose wisdom and loyalty will be of infinite value to those whom he seeks to serve! But hear him still further! Continuing his comment on the new party which was formed by the President's friends in opposition to Glycerio, to which party his friend and patron Bernardino de Campos belongs, he says:—"Without definite principles, programme, or leaders, it possesses no cohesive qualities, and must every day lose strength and prestige." What prophetic acumen! And twelve months later, we find this friend and champion of Julio de Castilhos, Glycerio and Manuel Victorino, this hostile critic in a London financial journal of an hour and a Sunday trial Brazilian President, exclaiming in his own defence, the champion of that same President's administration! Why is it? Is it because the elections went contrary to his expectations? Is it because he must lie with those who have the dispensing of patronage? Or is he a convert to the policy which *The News* has advocated for the last four years—that the President deserves and should have a strong and loyal support. Now that he has returned to the fold, he not only leaves behind him in his zeal to defend the administration he once condemned, but he actually constitutes himself a champion of its errors and faults as well! And not content with that, he gratefully accepts the favor of having his periodical printed in the national printing office! It is understood that there are men who want a newspaper to reinforce their special requirements, regardless of facts and principles, and for such men an independent journal has no attractions. But *The Review* has been engaged in this work for nearly twenty years and has thriven in such opposition. In spite of the patriotic speculators, and blundering financiers, who have been unceasing in denunciation of our "infirmitaries" and "hostilities," we have continued to promote and defend the best interests of Brazil. And the record of these years proves that we have been right and that our advice has invariably been for the best. As for the charge that while we are always denouncing a reduction in the army, we never decline to support expenditure in the navy, a falsehood is so apparent that a denial is not needed. Our readers know that we have recommended over and over again the sale of the ships under construction abroad and the suspension of all further orders. The charge was answered appropriately, for in such consumption, just as certain private incomes about an impending expulsion from the country, are designed for official encouragement. If the editor of *The Brazilian Review* wishes to drive us out of the field, he will have to try another plan of campaign, and one that will commend itself to honorable men. We have had no small experience in this capital, and the far from profits our belief that honest independent work is appreciated here as well as elsewhere. We have never asked for, nor accepted a favor from the government, which is more than many a foreign periodical has been able to say during these years. And we have succeeded, where they failed, simply because of our independence and frankness. If this is not hostility, and if it is not—then *The Brazilian Review* will confer credit and distinction on itself by dropping the subject and devoting its energies to the financial and commercial questions it professes to discuss.

—Dr. Campos Salles left for São Paulo on the night of the 2nd inst. in a special train. A private coach was provided for the President-elect and his family, to which was attached a coach for the newspaper reporters. It would be interesting to know if this family of press representatives are intending to stick to him all summer. This special train arrived at Taubaté at 8 o'clock on the next morning, where the party stopped two hours for breakfast. The journey was then resumed, the train reaching São Paulo at 2 p. m. on the 3rd.

LEGISLATIVE NOTES

Aug. 30.—*Senate*.—Senator Ottonia analyzed the estimates of the minister of finance for the year 1899. Comparing the estimated expenditure with the appropriations made for the present year showed that the minister asks for 26,535,195 more than the amount appropriated in the budget now in force. This increase in expenditure, he said, absorbs more than half of the sum of 47,000,000 temporarily saved in difference in exchange by the suspension of payments for which the funding scheme provides. But while the minister thus proposes to increase the expenditure, he at the same time omits three items whose total amount is 3,963,157\$841. This sum added to that of 316,000 423\$808, at which the minister estimates the expenditure for 1899, makes 319,963,585\$82. Moreover, added the senator, the minister overestimates the revenue for 1899. Taking the most recent revenue return as the basis of his calculation, Senator Ottonia asserted that the following reductions should be made in the minister's estimate of receipts:

1. Import duties.....	24,993,862\$000
2. Receipts of the Central railway.....	7,881,464\$000
3. Do. of the Post Office.....	2,109,000\$000
4. Do. of Telegraphs.....	3,000,000\$000
5. Product of Stamp Tax.....	1,300,000\$000
6. Do. of Transportation Tax.....	480,704\$000
7. Do. of Tax on Salaries.....	4,600,000\$000
8. Do. of Tax on Beverages.....	1,862,262\$000
9. Do. of Tax on Mines.....	3,610,708\$000
10. Do. of Tax on Transfer of Property.....	200,000\$000
11. Do. of Tax on Industries and Professions.....	50,130,000\$000

Total..... 50,130,000\$000
This sum deducted from that of 316,044,000\$ amount of the minister's estimate, leaves 266,925,915\$82. A comparison of the revenue with the expenditure for 1899, in conformity with the foregoing modifications in the minister's estimate, shows the following result:

Expenditure.....	319,963,585\$82
Revenue.....	266,925,915\$80

Deficit for 1899..... 53,037,670\$82

This deficit, said Senator Ottonia, will be increased to 58,937,670\$82 by the addition of 5,900,000\$ probable net amount of withdrawals of deposits.

Aug. 31.—*Senate*.—Senator Severino Vieira answered the speech made at the previous sitting by Senator Ottonia. A considerable portion of the increase in expenditure, proposed in the estimate of the minister of finance for 1899, consists, he said, of the following items:

Interest and sinking fund of the loan of 1897.....	9,600,000\$000
Increase in the interest on the remanent bonds.....	2,804,742\$000
Payment of the loan of 11,000,000 contracted in 1897 and of the expenses pertaining thereto.....	9,245,555\$555

21,650,297\$555

He defended the minister's estimate of the revenue for 1899 and said that the calculations of Senator Ottonia are founded on incomplete data.—*Chamber of Deputies*.—The majority of the special committee on affairs in Amazonas reported in favor of intervention of the federal executive, which, in conformity with the bill thus reported, must afterwards give an account of its acts to congress.

Sept. 1.—*Senate*.—Senator Ottonia defended his analysis of the estimates of the minister of finance, and severely censured the government for its impotence in making no preparations for meeting the emergency, which it has assumed in virtue of the funding scheme. In the first half of each of the last three years, the revenue derived from import duties was, he said, as follows:

1896.....	117,000,000\$
1897.....	112,000,000\$
1898.....	102,000,000\$

In view of this constant decrease in revenue from causes that are still in operation, the minister of finance, he asserted, is entirely unwarranted in estimating the amount of these duties for 1899 at 230,000,000\$. As in the reports of the Central railway, as may be seen in the last report of the minister of industry, the increase in virtue of the new rates amounted in the first quarter of the present year to 1,200,000\$. At this rate the increase for 12 months will be 4,800,000\$. Adding this sum to the amount of last year's receipts, we have 35,000,000\$, and not 42,000,000\$ at which the minister of finance estimates the receipts of the year. Senator Leopoldo Bulhões accused the preceding speaker of systematic opposition and calumniated the conduct of Deputy Serzedello, who, although a member of the opposition party, is aiding the government to resume the shattered credit of the country. He cannot, he said, accept the calculations by which the honorable senator attempts to show that there will be a deficit of 58,000,000\$ in 1899.—*Chamber of Deputies*.—There was received a message from President Prudente de Moraes transmitting a statement from the minister of war in regard to the necessity of a special appropriation of 92,716,672 for repairs on the barracks of the 7th and 23rd battalions of infantry.

Sept. 3.—*Chamber of Deputies*.—Deputy José Peregrino, a member of the special committee on affairs in Amazonas, spoke against the bill for intervention reported by the majority of the committee.

COFFEE NOTES

—There is much complaint of drought in the state of Rio de Janeiro. In many localities the food crops are a total failure. Many coffee trees have died and others have suffered so much that they will not bear next year.

—In the five years from 1893 to 1897, inclusive, the state of Ceará exported 6,017,023 kilos (100,283 bags) of coffee, valued at 7,182,367,070, not including that produced in the Araripe and Itapipati districts, some of which was consumed in the state and the rest exported overland to the neighboring states.

PROVINCIAL NOTES

—On the 3rd inst. 12 prisoners succeeded in effecting their escape from the jail at Pará.

—It is stated that Filoto has retained Dr. Arthur Lemos for his defence. The fee, it is said, is 200,000. Filoto can probably afford to pay it.

—A telegram of the 2nd inst. from Ceará says that in consequence of the threatening attitude of the police the journal *Rebelle* has been obliged to close its office.

—A banquet was given to Dr. Luiz Piza, president of the São Paulo assembly, on the 31st ult. It was given by the deputies over whose sessions he had presided.

—The governor of Ceará telegraphs that he has ordered the suspension of the publication of the journal *Rebelle* because it has been instigating its enemies to murder him.

—Col. Salgado has been transferred from the command of the garrison of Porto Alegre to that of the garrison of Uruquiana. Col. Silvestre takes command of the garrison of Porto Alegre.

—It is worthy of note that José Mariam and Martins Junior have united their forces to contest the next municipal election in Pernambuco. Will it be story of the wolf and the lamb over again?

—The «sociable» held at the Larangeiras Club on Saturday evening last was a great success. Dancing was kept up until 1 a. m. All these present enjoyed themselves immensely, and hoped the committee will see their way to continue these entertainments as long as the temperature permits.

—In Ceará a region with a radius of 20 leagues (80 miles) has recently been devastated by fire, supposed to have originated from a match thrown among dry leaves by a hunter. The loss is said to be considerable, many families having been obliged to abandon precipitately their dwellings which were consumed by the flames.

—Consul Rawson-Walker, who died at Manila on the 2nd ult., was British consul representative at Pernambuco years ago, where he will be remembered by a wide circle of friends and acquaintances. He was appointed to Manila three years ago where he recently distinguished himself in his efforts to protect the lives and property of British subjects.

—It is reported that Pensator has sold his chácara in Manaus for 1,200,000 to the state of Amazonas for the purpose of establishing a museum. Now, if they will erect on the grounds a building sufficiently strong and secure to put in it all the persons who have been robbing the state, they can certainly form a very large and interesting zoological collection.

—It is stated that, when the notorious Guido de Souza was dismissed from the office of chief of police of Amazonas, there was general rejoicing at Manaus. The official instruments of torture of which he had made use, were placed on exhibition and the horrible prison cells which he had caused to be constructed were thrown open and displayed to the gaze of the horrified but jubilant multitude.

—A telegram from Porto Alegre says that on the 31st ult., a riot broke out among the inhabitants of that city by a violent hail storm, which interrupted transit in the streets, wounded several persons and caused considerable damage to buildings. Although the storm lasted only a few minutes, the streets were covered with hail stones, some of which weighed 50 grammes (nearly two ounces).

—In the city of Porto Alegre there were registered 1,203 deaths in the first half of the present year. Of these deaths 122 were caused by lung diseases, 74 by accidents, 7 by homicide and 4 by suicide. Of the deceased 1,053 were Brazilians, 145 foreigners, and 1 not specified; 739 white, 176 negroes and 288 mulattoes; 691 males and 512 females; 84 single, 178 married, 74 widows and widowers and 20 not specified.

—The state government of São Paulo has granted the land on which the São José theatre stood, to Dr. José Nahor Pacheco Jordão for the construction of a new theatre. But why should the state give property like this to a private individual for such a purpose. A theatre is not a public enterprise, nor a public necessity, nor a charity. The idea that the government must build or subsidize theatres is rank folly.

—We have at last discovered a man who seems not to be an Abyssinian. This is the administrator of the post-office at S. Paulo, who, according to the *Diário Popular*, not only did not hesitate to say that he does not believe in these demonstrations in honor of Campos Salles, but even refused to permit the Abyssinians to ornament the post-office. He probably expects to retire from service before the end of the year.

—A telegram of the 31st inst. from Bahia says that the printing office of the *República* is threatened with an attack.

—The smoking concert at the Larangeiras Club which was announced for the 7th inst. will not take place until the 8th. The committee evidently wished to give a hearty reception to their visitors from S. Paulo, and as the *Thames* is not expected until about 9 o'clock on Wednesday morning, the smokers have been put off until the evening of the next day. Independently of what musical ability there may be amongst the visitors, we y effort is being made to make the concert a complete success.

—A grand cock-fight is to take place at Piracichó (the home of President Prudente de Moraes) to-morrow, at which a champion cocks are expected from neighboring São Paulo towns, and one even from Rio de Janeiro. The cocks are described as «famous» (why not «mild» and «illustrious»?) and the bets on their heads exceeded 5,000 some days ago. It will undoubtedly be an illustrious gathering and will in much to encourage the ancient and honorable pastime of cock-fighting. The silver notes of the challenging cocks will also blend harmoniously with the speeches and music on that day in honor of Brazilian independence.

—The city of Porto Alegre is said to have at the present time 99,109 inhabitants or nearly double the number which it had ten years ago. A considerable part of the increase in population is due to the state of general insecurity in the interior, which has caused many former residents of nearly all the various localities to remove to the capital. The inhabitants are classified, according to the race from which they originated, as follows:—Portuguese, 62,000; German, 27,000; Italian, 5,100; African, 3,400; Syrian, 1,250; Spanish, 162; French, 88; Anglo-Saxon, 26; other nationalities, 173. The population of the whole of the municipal district to which Porto Alegre belongs, measuring 98 square leagues, is estimated at 115,000. The increase in population has created a demand for houses and rents are said to be nearly as high as in Rio de Janeiro. To meet this demand about 5,000 houses have been built in the last ten years.

RAILROAD NOTES

—It is announced that the inauguration of the extension of the União S. Paulo e Maranhão from S. Manoel do Piauí to Lages, will take place on the 7th inst. This extension is 41 kilometers long. It is a curious problem how this company finds money for these extensions when it has so little for interest on its debt.

—As we expected, the increased fares on the Santa Theresá electric line are already driving people away. We are told people who left Santa Theresá for this reason alone and the number of vacant houses in the district is convincing proof of it. If a popular district is no longer attracting residents, there is a limit to human numbers in that matter, so the tramway company will soon find to its cost.

—The manager of the Great Western line (Pernambuco) has kindly sent us this table of the trains running between Pernambuco and Timbuba, which carries a sketch map showing the stations along the line and also the connections north with the Comle d'Eu and Natal e Nova Cruz lines. There is a break of only eight leagues between Timbuba and Pilar, the terminal point on the Comle d'Eu line, and arrangements have been made for the convenience of passengers between these two stations.

LOCAL NOTES

—The congressional session has been extended to October 2nd.

—During the first half of the present year there were reported to the Inspectoria de Isolamento in this city 1,110 cases of yellow fever, against 3,384 in 1896.

—After some days of oppressive heat there was a welcome fall in temperature on Sunday morning, with a slight rain. It was not enough, however, to do us any good.

—We have again to thank Mr. J. B. Aiton, the courteous purser of the R. M. S. *Orellana*, for his kindness in sending us a large bundle of well-assorted home papers dated up to August 13.

—The *Journal do Commercio* of last Friday contained a biographical sketch of Senator Quintino Bocayana. Quintino is evidently afraid that, unless something is said of him, he will soon be forgotten.

—The number of advertisements in the daily papers in regard to missing umbrellas, top-coats, etc., at the Cassino last week, would seem to imply a very considerable degree of negligence in the cloak rooms.

—We were favored by an invitation to witness the inauguration of the Thaumastion which is being exhibited at No. 132, Rua Visconde, but as the invitation was for Sunday last we were unable to attend.

—Should the scarcity of water continue much longer, many people will have to give up their houses and withdraw to places where water is to be obtained. In some streets the scarcity is much greater than in others.

—On Sunday the youngest daughter of President Prudente de Moraes presented to the corps of national marines a flag worked by her elder sisters. The presentation was made the occasion of a very interesting ceremony.

—We have to thank the directors of the Larangeiras Club for their courteous invitation to the ball fixed for the 17th inst. The popularity of these entertainments has become so great that a full attendance is one of the certainties.

—From the programme published of the festive day to-morrow, and in view of the preparations on foot, more money will be expended on the celebration this year than for many years past. Even the public garden of the Campo d'Acclimação is to be illuminated.

—In his report to congress the minister of justice urges the creation of a «forum» in this capital. Justice is certainly very badly housed, and something might be done in this direction. But on the other side, we are not provided with a quality of that article which requires a very sumptuous writing.

—The reports of the sanitary board of this city for the month of July show 1,221 deaths, 1,219 deaths and 231 marriages. Among the deaths were 65 from yellow fever, 16 from beri beri, 19 from dysentery, 9 from typhoid fever, 28 from pernicious fever, 58 from other malarial causes, and 184 from pulmonary consumption.

—In his speech at the banquet on Wednesday Campos Salles said that his administration will adopt the policy of peace and economy. In opposition to this policy a humorous writer proposes to argue a party whose policy will be extravagance and disturbances. We fear that the humorous writer's policy will prevail.

—After struggling with a pint of water and a bit of sponge for his morning bath during the past week, a gentleman went to the Camp baths last Sunday morning with expectation of having a luxurious half-bath in a tub full of water. But to his surprise, he was there told to come again as there was no water at the moment.

—The senate finance committee is determined to force economies at all hazards, and it has therefore suppressed an appropriation of 10,000 for a premium for one or more memorials on the discovery of Brazil. This is probably a fair sample of the discriminations which the *Brazilian Review* is pleased to advocate.

—A telegram published in the *Journal do Commercio* on the 2nd inst., dated London 1st inst., says:—«In Aberdeen a monument is being constructed in honor of granite.» Now let the *Journal* tell us—«In Newcastle a ship is receiving a cargo composed of soda, and we shall feel that the Argus-eyed reporter is on the alert always.

—Every one interprets as he wishes the speech made by Campos Salles at the banquet at the Cassino on last Wednesday. The inference to be drawn from this is that he ably refrained from committing himself. Consequently it is impossible to form any safe conjecture in regard to his policy, in relation to which opinions widely differ.

—We are indebted to F. Palm, Esq., consul-general at the Netherlands, for a handsome, embossed card commemorative of the birthday anniversary, August 31st, of the young queen of that country, on which day she celebrated her majority and was crowned. Consul Palm will accept our hearty congratulations on this happy and, let us hope, fortunate event.

—The *Journal do Commercio* says that, according to the *boletim de estatística demographica sanitaria*, there were 176,500 arrivals in this city in July and 167,250 departures. This is evidently a mistake, and the figures, we conjecture, really refer to the seven months from Jan. 1st to July 31. Such carelessness in handling figures is harmful and inexcusable.

—At a meeting of the Instituto Historico e Geographico on the 26th ult., it was proposed by Baron Homen de Mello that a *fac simile* edition of the documents relative to the discovery of Brazil should be published in commemoration of the 40th anniversary of that event. Unfortunately the documents referred to relate only to Cabral's discovery. Nothing is said of Pinzon, the first discoverer.

—The man selected to write the biographical sketch of Senator Quintino Bocayana published in the *Journal do Commercio* is evidently what is called here an *amigo novo*. He endorses Quintino for conduct so vile and unbecoming that no one, unless utterly devoid of a sense of honor, would think of being guilty of it. Up to the present, however, Quintino has not published a disclaimer.

—An attempt was made to assassinate the Brazilian consul at Buenos Aires, Sr. Barnoso Bastos, on the evening of the 30th inst., as he was entering the residence. The assassin, named Soromenho, inflicted several dangerous wounds with a knife on the head of his victim, but it is thought they will not result fatally. Soromenho was captured and says he had no other recourse as Bastos would not fight a duel with him.

—There were two destructive fires on the 30th ult., one at No. 15 and 17, Rua General Camara, Costa Carvalho & Co., hardware and crockery, insurance 370,000 on stock and 100,000 on buildings all in national companies, estimated loss on stock 100,000; and the other at 121, Rua do Ouvidor, confitaria «Braça de Ouro» with sundry tenants on first and second floors, total insurance 105,000 outside of building, losses not given.

—It is worthy of note that the Congregação dos Filhos do Trabalho D. Carlos I Rei de Portugal, of this city, has tendered its congratulations to the representatives of the United States and Spain on the termination of the war between those countries.

—The scarcity of water is so great in the neighborhood of the Strauch Hospital that boys have been known to climb over the high iron railings at the entrance to the hospital grounds, at night, in order to draw water from the tank from which it is pumped up to the reservoir. To climb into the hospital grounds and then to pass the full buckets back over the fence, shows that there is urgent need for the fund, for surely no one would go through such a feat for the fun of it.

—It is a pleasure to note that Dr. C. M. Grud, for many years pastor of the German Lutheran Church in this city, celebrated on the 31st ult. the 25th anniversary of his directorship of the German school in Rua dos Arcos. The school has enjoyed a high reputation, not only among German residents, but also among Brazilians, many of whom have had their boys educated there. Dr. Grud has been the recipient of many congratulations, among whom we should be glad to have ours included.

—Gen. Leite de Castro, of invariable notoriety, has been publishing a series of articles on horses for the cavalry. In one of these articles he says that the army bill fixes the number of soldiers at 25,000 and congress votes appropriations for 16,000, while in reality there are only 14,000. He suggests that the difference between the cost of 16,000 soldiers and that of 14,000 should be expended in maintaining government stables for breeding cavalry horses. His it never occurred to you, General, that there may be a more profitable way of employing that money than squandering it either on non-existent soldiers or on problematical horses? Why not use it, for instance, in paying interest on the public debt?

BIRTH.

At Pará on 7th August, the wife of Harry Corin, of Ason.

MARRIAGE.

STEEL—BESS.—On the 22nd August, by Brazilian civil ceremony in presence of E. Nicolini, Esq., H. B. M's Consul, and afterwards at the English Church, Bloor, by the Right Rev. the Lord Bishop of the Falkland Islands, REYNALD DE CRECY STEEL, second son of the late Charles Deane Steel, M. D., Dep. Insp. Gen. R. N., of Bedford, to ELLIOT CONSTANCE, eldest daughter of Frederick Benn, Esq., of Bahia.

DEATHS.

LE CESKE.—On the 31st August, at Tijuca, of atrophy, Mrs. PAUL CHESTER EUGENE LE CESKE, aged 70. The interment took place in the Gamboa cemetery.

Treasurer.

Rio, 5-9-98

—We have been right to announce that on Sunday next the Right Rev. W. H. Stirling, Lord Bishop of the Falkland Islands, will preach at the Church service held in the V. M. C. A. hall at 11 a. m. There will doubtless be a large congregation on this occasion.

—The Rev. G. R. Craven, British chaplain at S. Paulo, is leaving that town, and will pass through Rio on his way to England by the Royal Mail steamer *Thames* to-morrow. He will thus have an opportunity of meeting his bishop here and saying good-bye to many of his old friends. We regret to hear that the rev. gentleman's departure from Brazil has been hastened by family bereavements.

BUSINESS NOTES

—A recent telegram from Ceará says that the drought and gambling are ruining trade and depriving the people of the means of subsistence.

—According to the prefect of the federal district the receipts of beeves from the River Plate for this market in the 1st half of the present year were 4,000, and the receipts of sheep from the same source during the same period were 4,316.

—The district judge of this city, Dr. Gonfredo Cunha, has recently decided against the defendants and the Santos Docks Co. in a suit instituted by the Empresa Portuária, Gerente and Joaquim Xavier Pinheiro for the destruction of the pier belonging to the *Brail* and *S. Paulo tripiches* at Santos. The defendants are condemned to restore the service of the *tripiches*, rebuild the pier and indemnify the plaintiffs for their losses. We know nothing of the merits of the case, but we are glad to see that the courts are beginning to hold the government responsible for the arbitrary exercise of authority.

—The prefect of the federal district estimates the municipal revenue for 1909 at 16,588,450 and the expenditure at the same sum. The expense with *personnel* he estimates at 6,639,825,584; but there are many items in which the expense with personnel is evidently not discriminated from other expenses. The service of the municipal debt absorbs the sum of 3,206,950. For payments, canals, bridges, etc., the estimate is 1,200,000, and for street cleaning 428,600.

— The time for redeeming the 1005 Treasury notes of the 5th and 6th estampes without discount having expired on the 31st ult., the notes will now be subjected to a discount of 2 per cent (250m) for the next three months, of 4 per cent (4500m) for the following three months (Dec.— Feby.), of 6 per cent for the next three months (March— May), of 8 per cent for June to August, of 10 per cent for September, 1899, 15 per cent for October, 20 per cent for November, 25 per cent for December, and so on by an increase of 5 per cent monthly until the notes become valueless, which will be in March, 1901.

Sep. 1.—The Brazilian and London & Brazilian Banks adopted an official rate of 7/6½d on London, which was followed by the Bank of England. In the course of the day the English bank raised its discount rate to 4½ per cent., but later on the British Bank put out 7/6½d, which the Brazilian Bank immediately followed. The market for gold was firm during the morning, the banks drawing freely at 7½ d, without finding any important demand. The exchange for American business in private paper at 7½ d held both for time and sight.

Some small transactions took place in bank bills at 7½ d, and likewise appeared at once. By 2 o'clock, however, the market had become more active, and draw freely at 7½ d at which rate business was done in private paper. The closing prices of the day were as follows:—Brazilian bank notes at 7½ d, £ s. d.
7 0 0
and 7 1½ d, with sellers at 7½ d.
The official value of the paper milreis was from 275 to 282

MARKET REPORT.
Rio de Janeiro, 5th September 1898

and against entries of 10,000 bags and shipments of 60,675 bags. On Monday the market was dull, the factors finding the packers indifferent, and the business that was done was arranged on a base of 15,000 for No 7. The shippers trying to avail themselves of the uncertainty of the factors, offered low prices to the packers, but these resisted and at night it was known that 4,000 bags had been sold at prices which ranged from 25 to 30 cents.

patterns. Fancy-work and many other articles for
Ladies use.

NECTANDRA AMARA

The discovery of this wonderful product
of the Brazilian flora has furnished a
powerful and efficacious remedy notably
for sea-sickness, but also for the various
feels in pregnancy and that which results
from the motion of the train on railways
as well as for the various ailments of the stomach
and bowels as require a good tonic car-
minative, digestive or regulator for promoting
assimilation.

The Nectandra Amara Pills are prepared
with all scientific precautions for their
perfect preservation and are put up in
strong boxes, so that they may be forwarded
by post in filling orders from all parts
of the world. They are accompanied
with printed directions in three languages
—Portuguese, English and French—so that
their therapeutic effects and the manner
of taking them may be readily understood.

accompanied by the money and the post-
office address of the applicant, will be
promptly filled and the pills will be for-
warded registered by post, at the follow-
ing rates:—Per single box, 25,000; per
half-dozen boxes, 125,000; per dozen boxes
250,000.

Address of manufacturer:—Joachim Ba-
eno de Miranda, Rua de S. Pedro, N. 74,
1.º andar, Rio de Janeiro, Brazil.

THE RIO NEWS.

This paper is now in its 24th year, having originally
been published as *The South American Mail* and *The*
British and American Mail. It assumed its present
title at the beginning of April, 1874, when it was pub-
lished three times a month. From a tri-monthly it has
been changed to a weekly publication, and from four
pages it has been increased to twelve.

As an advertising medium *The Rio News* occupies an
exceptionally advantageous position. It circulates
wholly throughout Brazil, and also in Europe and the
United States. Its subscribers are principally business
men interested in Brazilian trade, industries and in-
vestments. No other periodical, even with much
larger circulation, can offer better inducements to ad-
vertisers who seek the attention of these classes.

All communications should be addressed to the
Editor and Publisher, Caixa do Correio 358, Rio de
Janeiro.

Companhia Nacional de Navegação Costeira.
